WE COAT THE WORLD

TIME FOR CHANGE

Allter's founders are professionals from both the traditional and innovative coating industries. Allter is driven by ideals. It's time for a change, both in durability and sustainability. Together, the developers at Allter have over 160 years of collective experience in the sector. We are firmly convinced that change is possible, and that a new, different approach to future-proof total solutions is what is needed.

OUR ALTERNATIVE SOLUTIONS

Allter is an alternative coating brand offering unique solutions to under- and above ground steel assets. Allter sets a new standard for future-oriented thinking in the coating industry when it comes to product safety during the manufacturing, application and in service.

BIOMIMICRY BY DESIGN

Allter's emission-free and chemical inertia reflects some of our company's main priorities. We consider it the duty of the inhabitants to take care of this planet. Allter® aims to contribute to better, safe protection of the environment where pipework, joints and installations are concerned.

The alternate for steel protection

Allter focuses on emission-free corrosion prevention for durable assets. Allter is an alternative coating brand comprising of 5 unique divisions offering unique solutions to under- and above ground steel assets such as pipelines, risers, flanges, valves, storage tanks: Prime™, Visco-Rite™, Guard™, Tape™ and Therm™. Allter focuses on emission-free corrosion prevention for durable assets.

Key Features

- ✓ Inspectable
- ✓ Emission free
- ✓ Quick and easy to install
- ✓ High specific insulation
- ✓ High temperature (230° C) resistance
- ✓ Surface tolerant, including to moisture
- ✓ Stress free and void free
- ✓ No cracking or disbonding
- ✓ Full and permanent steel coverage
- ✓ Safe for applicators and environment
- ✓ Lasts as long as the asset it protects
- ✓ Withstands expansion and contraction
